

Cisco Aironet 350 Series Workgroup Bridge

Designed to meet the needs of remote workgroups, satellite offices, and mobile users, the Cisco Aironet® 350 Series Workgroup Bridge brings the freedom and flexibility of wireless connectivity to any Ethernet-enabled device. The workgroup bridge quickly connects up to eight Ethernet-enabled laptops or other portable computers to a wireless LAN (WLAN), providing the link from these devices to any Cisco Aironet Access Point (AP) or Wireless Bridge. The Cisco Aironet 350 Series Workgroup Bridge offers:

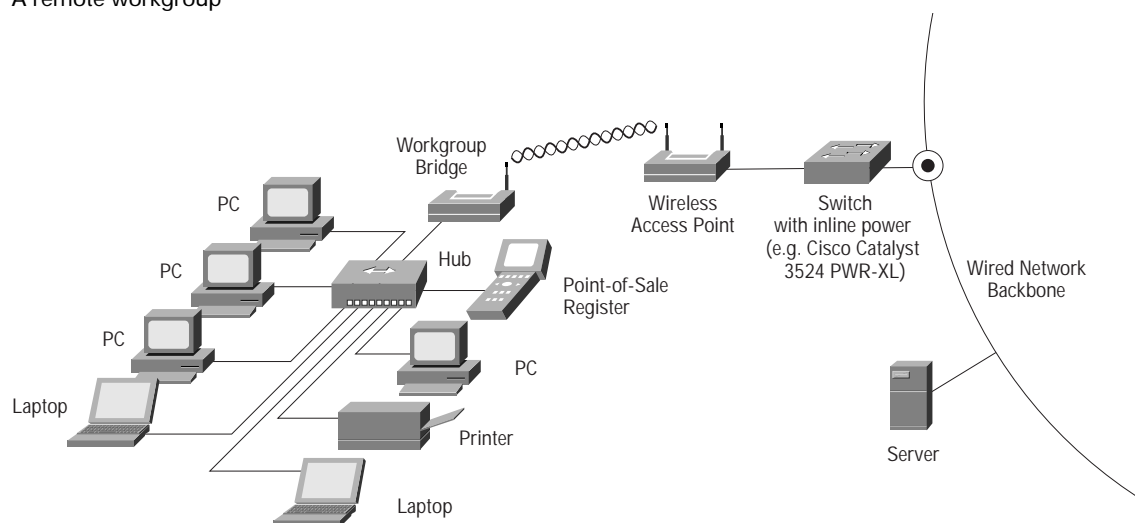

- Driverless installation of up to eight Ethernet-enabled devices
- Optimum wireless performance and range
- Standards-based centralized security
- Two versions for a range of application requirements
- Full-featured utilities and robust management

Support for a Variety of Applications
Any Ethernet-ready device, including printers, copiers, PCs, point-of-sale devices, or monitoring equipment, can be placed directly at the point of work using the workgroup bridge—without the expense or delay of cabling. For temporary classrooms or temporary office space, the workgroup bridge provides flexible, easy network access for up to eight devices through the use of a standard eight-port Ethernet hub (see Figure 1). Equipment can be easily moved as workgroups change in number or location, lowering facilities costs.

Leading Throughput and Range
With a full 100-milliwatt (mW) of transmit power and the best receive sensitivity in the industry, the Cisco Aironet 350 Series Workgroup Bridges provide the longest range and best reliability available for wireless clients. Advanced signal processing in the Cisco Aironet 350 Series helps manage the multipath propagation often found in office environments. Intelligent filtering addresses ambient noise and interference that can decrease network performance. Building upon Cisco leadership in WLAN performance, Cisco Aironet 350 Series Workgroup Bridges provide the greatest throughput available so users can enjoy virtually the same connectivity they gain from wire-line connections. Based on direct sequence spread spectrum (DSSS) technology, the Cisco Aironet 350 Series Workgroup Bridge operates in the 2.4 GHz band and supports data rates up to 11 Mbps.

Figure 1 A remote workgroup

Centralized Security Architecture

The Cisco Aironet security architecture is based upon an IEEE 802.1x standard utilizing the Extensible Authentication Protocol (EAP), the open standard that enables wireless manufacturers and RADIUS server vendors to independently develop interoperable hardware and software. For authentication of devices attached to the workgroup, a username and password may be stored in the workgroup bridge in either static or dynamic memory. When authenticated, the workgroup bridge receives a single-session, single-user encryption key from the Remote Access Dial-In User Service (RADIUS) server via the associated AP. With this centralized and standards-based architecture, wireless security scales to meet the requirements of any enterprise.

The Cisco Aironet 350 Series Workgroup Bridge supports Wired Equivalent Privacy (WEP) security architecture and provides up to 128-bit encryption.

Flexible and Manageable

The workgroup bridge is available in two versions: one with a single, omnidirectional dipole antenna and another with two RP-TNC connectors for applications that require antenna diversity or higher-gain antennas for long-range applications. Other features include advanced diagnostic tools to simplify troubleshooting, remote system configuration, and management via browser, Telnet, File Transfer Protocol (FTP), or Simple Network Management Protocol (SNMP).

The Preferred Solution for Mobile Devices

The Cisco Aironet 350 Series Workgroup Bridge delivers superior range, reliability, and performance for business users who need information access anytime, anywhere (see Figure 2). The workgroup bridge quickly connects any Ethernet-enabled laptop or other portable computer to a WLAN, providing a “plug-and-play” solution for e-mail and Internet access. Combined with unique Cisco security services, this product ensures that business-critical information is secure. Most importantly, Cisco workgroup bridges are easy to use, making the benefits of wireless mobility completely transparent.

Figure 2 Mobile Ethernet enabled user connecting to a workgroup bridge

Table 1 Cisco Aironet 350 Series Workgroup Bridge Specifications

Data Rates Supported	1, 2, 5.5, and 11 Mbps
Client Interface	10BaseT Ethernet
Clients Supported	Direct: One Via hub: Eight
Network Architecture Types	Infrastructure (via Cisco Aironet AP or Bridge)
Frequency Band	2.4 to 2.4897 GHz
Wireless Medium	Direct Spread Spread Spectrum (DSSS)
Media Access Protocol	Carrier sense multiple access with collision avoidance (CSMA/CA)
Modulation	DBPSK @ 1 Mbps DQPSK @ 2 Mbps CCK @ 5.5 and 11 Mbps
Operating Channels	North America: 11 ETSI: 13 Japan: 14
Nonoverlapping Channels	Three
Receive Sensitivity	1 Mbps: -94 dBm 2 Mbps: -91 dBm 5.5 Mbps: -89 dBm 11 Mbps: -85 dBm
Delay Spread	1 Mbps: 500 ns 2 Mbps: 400 ns 5.5 Mbps: 300 ns 11 Mbps: 140 ns

Table 1 Cisco Aironet 350 Series Workgroup Bridge Specifications (Continued)

Available Transmit Power Settings	100 mW (20 dBm) 50 mW (17 dBm) 30 mW (15 dBm) 20 mW (13 dBm) 5 mW (7 dBm) 1 mW (0 dBm) Maximum power setting will vary according to individual country regulations.
Range (typical)	Indoor: • 130 ft (40m) @ 11 Mbps • 350 ft (107m) @ 1 Mbps Outdoor: • 800 ft (244m) @ 11 Mbps • 2000 ft (610m) @ 1 Mbps
Compliance	Operates license free under FCC Part 15 and complies as a Class B device; complies with DOC regulations; complies with EN 300.328 standards
SNMP Compliance	MIB I and MIB II
Antenna	AIR-WGB352C: One nonremovable 2.2-dBi dipole AIR-WGB352R: Two RP-TNC connectors (antennas optional, none supplied with unit)
Encryption Key Length	AIR-WGB352x: 128-bit
Status Indicators	Three indicators on the top panel provide information concerning association status, operation, error/warning, firmware upgrade, and configuration, network/modem, and radio status
Remote Configuration Support	Telnet, HTTP, FTP, TFTP, and SNMP
Dimensions	6.30 in. (16 cm) wide x 4.72 in. (12 cm) deep x 1.45 in. (3.7 cm) high
Weight	12.3 oz (350g)
Environmental	Temperature: 32° to 122°F (0° to 50°C) 10 to 90% (Noncondensing)
Input Power Requirements	North American: 120 VAC @ 60 Hz Universal: 90 to 264 VAC @ 47 to 63 Hz
Warranty	One year
